

Massamolla is a freely downloadable collection of royalty free one shot drum hits, foley percussion sounds and abstract sound effects created by Shmertz, a gifted sound designer and the mastermind behind the Silence+OtherSounds label. Dive into a mesmerizing collection of abstract percussive noises, otherworldly textures and almost bizarre soundscapes that will add a sense of depth and richness to your audio projects.

So, why Massamolla? Well, massa molla means mass spring in Italian and this really fits the mechanical and oddly machine-like nature of the included sounds. A spring also resembles the shape of an audio waveform, so there you go. :)

Contents

99 audio samples

24-bit WAV format

266 MB size on disk
